Andorra

Arbon

Chalford

Colmar

Cush

Jericho

La Roche

Our range of limestone is bound to make a statement to architecture and design enthusiasts alike. This provincial flooring range includes a number of varieties, which have been tumbled to give a distressed, aged appearance. Even newly laid stone has a real "lived in" feel, as if it has been there forever, offering a timeless appeal. With subtle colour movement and tonal change, like all natural stone, they just get better with age.
