## CRAZY PAVING

### ORGANIC MOVEMENT THROUGH IRREGULAR SHAPES

Crazy paving is an historical flooring method that has its origins in Ancient Rome. In Crazy Paving, also referred to as Flagstone, irregular recovery stone pieces are laid randomly to create a seamless, organic and unique surface suitable for flooring and walling.

The texture, density and natural colour variations make Crazy Paving ideal for courtyards, garden paving, pool surrounds, pathways and curved designs. But more and more we see it used indoors to achieve an organic relaxed interior design aesthetic.

Our Crazy Paving stones and Flagstone materials are dense and thus incredibly durable, have natural variation in colour and have been processed to ensure a relatively consistent dimensional accuracy.

## INSITU TERRAZZO

### WHEN CRAZY PAVING MET TERRAZZO

We've taken two much-loved materials and reimagined them into a new flooring format called Insitu Terrazzo; think blown up Terrazzo in a freestyle Crazy Paving format.

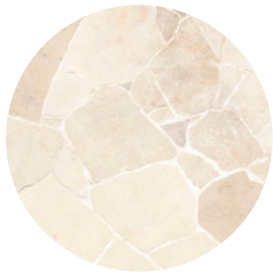

Smaller pieces than Crazy Paving also known as Flagstone, larger pieces than traditional Terrazzo, Insitu Terrazzo sits uniquely in between and allows us to be even more creative with how we craft offcut materials into extraordinary surfaces.

Insitu Terrazzo comes in highly irregular shapes and sizes meaning you can freestyle the layout and create an inimitable look for each design project. This flooring format is flood grouted with a smooth finished texture ideal for internal environments.
