## ORGANIC MOVEMENT THROUGH IRREGULAR SHAPES

Flagstone, or Crazy Paving, is an historical flooring method that has its origins in Ancient Rome. Today, the irregular shapes of the natural stone can be used to form a juxtaposition in a modern architectural setting.

The texture and natural color and size variations make Flagstone ideal for courtyards, garden paving, pool surrounds, pathways and curved designs. The format allows for movement in a flooring aesthetic that is also a perfect means to visually break open a space

Our Flagstone stones are dense and thus incredibly durable; have natural variation in color and have been processed to ensure a relatively consistent dimensional accuracy.
