GENTLE & TACTILE UNDERFOOT

Sandstone is a classic building material that has been used in construction since prehistoric times. Our sandstone flooring options present an aged, distressed hand finish for a tactile feel underfoot.

The sedimentary layers of sandstone pavers present a unique and varied color profile which can be very forgiving as the natural material ages and adds to the individual personality of each paver.

Our sandstone range complements both traditional and modern designs and are developed to bring out their natural color tones and character.
